V2 PRO SOLUTION

America's Frontline

MESSAGE FROM THE PRESIDENT & FOUNDER

We know that today's public safety professionals are under more pressure than ever before and this is what drives the team at First Tactical to listen to your challenges, develop solutions and work with our distribution partners to provide the best in class uniform offering. We hold true to our commitment to provide durable, functional and comfortable products that exceed your expectations while delivering them at a value.

We have developed a fabric called "V2" that is the end result of the past 20+ years of our design team's quest for the ultimate fabric for public safety professionals. It delivers on the promise of an easy care, home laundry uniform with mechanical stretch, Teflon finish and double dyed to last during the challenges of daily wear. We have expanded the "V2" fabric into the Patrol Duty Uniform line which also has a women's fit that has been praised by female customers since we introduced it to the market. We are confident that the V2 Pro uniform checks all the boxes and will meet with the demands of today's public safety professionals around the world.

As part of our mission, we listen to our customers and develop products that provide functional innovation. This year we are introducing our Pro Duty Pullover. This may be the most comfortable outerwear that you have ever worn for both on duty and off. The four-way stretch nylon provides comfort and mobility while the softshell fabric on the sleeves and collar provides warmth and water repellency. We have also expanded our popular Tactix outerwear line by adding a rain pant so now you can have full body coverage during heavy down pours by just pulling them over your uniform pants.

THANK YOU for what you do for our communities every day.

We appreciate your dedication and service.

Stay Safe,

Dan Costa,
President & Founder

Bob Denny,
Chief Operating Officer

DETERMINING YOUR SIZE:

Using a measuring tape, measure your body (not over clothing) & refer to body charts to determine the best size. If you fall between sizes, we recommend ordering the larger size.

Women: Utilize your chest measurement to determine the proper size for tops or outerwear; utilize your waist & hip measurements for bottoms

HOW TO MEASURE:

Chest: Measure under arms and around the fullest part of your chest with measuring tape parallel to the floor

Waist: Measure around the natural part of your waist (the smallest part of your waist)

Hip: Stand with your feet together & measure around the fullest part of your hip with the measuring tape parallel to the floor

Arm Length: Slightly bend elbow & measure from center back neck, over top of shoulder & down to wrist

Inseam: Measure inside of leg from crotch to ankle or desired length
